Place: hall 3, booth number: 3-220

Floor plan

Hall 3, booth 220

EEX and ECC at E-world 2012

EEX/ECC panel discussion for journalists

Dear Sir or Madam,

Since the onset of the financial market crisis, the political sector and the regulatory authorities, in particular, have paid more attention to the risks and consequences of a default of players on the market. At the moment, various acts of legislation deal with the advantages of settlement by central counterparties and assign clearing houses an outstanding role for the future. In addition to the classical financial markets, this will also concern the energy trading market.

In a press workshop at the E-world energy & water in Essen we would like to illustrate the role of the clearing business against the backdrop of these current developments. Peter Reitz, CEO of EEX and ECC, Dr Thomas Siegl, Member of the Management Board and CRO of ECC, and Vincent van Lith, Head Energy Markets Clearing & Listed Derivatives of Deutsche Bank, are pleased to present this as well as other subjects in the framework of the event.

Therefore, we cordially invite you to the:

EEX press workshop entitled “2012 – Year of Clearing for the Energy Industry!?” on the occasion of the E-world

on Tuesday, 7th February 2012 at 1:00 pm at the Panorama hall above trade fair hall 3.

The event is scheduled until 2:30 pm.

Please send an e-mail to eileen.hieke@eex.com by 2nd February 2012 to let us know whether we may expect you.

We look forward to welcoming you in Essen.

With kind regards,

Eileen Hieke
